SUMMARY

Full-stack developer with 10+ years of experience building business systems end to end: Angular frontends, Node.js and .NET APIs, Flutter mobile apps, and deployments on AWS and Firebase. For the last 3.5 years I worked remotely for Nuvol Solutions (US) on mobile-network monitoring platforms used by telecom regulators and carriers across Latin America. Before that, I contributed to the in-house ERP of a business group, used daily by about 100 people. I work with hexagonal and clean architecture, monorepos and Scrum.

TECHNICAL SKILLS

Frontend: Angular (10–19, signals, NgRx), TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Angular Material, Bootstrap, Chart.js, Plotly, Leaflet

Backend: Node.js, Express, NestJS, ASP.NET Web API (C#), Entity Framework, PHP (Laravel, PHP 8), Python, REST APIs, WebSockets / SSE, Swagger / OpenAPI, JWT + RBAC

Mobile: Flutter / Dart

Databases: MongoDB, SQL Server, MySQL / MariaDB, PostgreSQL, DynamoDB, Firebase Realtime DB / Firestore

Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB, Cognito, SES, Amplify, SAM), Firebase (Functions, Hosting), Git, PM2, IIS, Apache

Practices: Hexagonal Architecture, Clean Architecture, monorepos, Scrum / Jira

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer — 03/2023 – 09/2026

Nuvol Solutions LLC — *McAllen, TX, USA · Remote*

- Contributed to building and maintaining Medux LATAM, a platform for real-time and historical monitoring of mobile network quality probes (4G/5G). It is used by telecom regulators and carriers in several Latin American countries. Stack: Angular 17 + NgRx, Node.js/Express, MongoDB, with Swagger-documented APIs.
- Helped build Probe Inspector from scratch: a monorepo (pnpm + Turborepo) with a hexagonal-architecture Express API, an Angular 19 web app (signals), a Flutter app for field technicians, MongoDB, real-time notifications (WebSockets/SSE) and JWT role-based access. Worked in Scrum with Jira.
- Helped automate quarterly regulatory reports per carrier with Node.js and ExcelJS, processing 4G/5G speed and coverage samples. This replaced work that was previously assembled by hand.
- Contributed to the Medical Office frontend (Angular 16, Nx monorepo, NgRx) for tracking patients and appointments inside clinics, on a serverless AWS backend (Lambda, API Gateway, DynamoDB, Cognito via AWS SAM).

Senior Developer — 03/2019 – 02/2023

Grupo RG (Stargas) — *Maracaibo, Venezuela*

- Contributed to Elzyra, the group's in-house ERP, used daily by about 100 people: 120+ ASP.NET Web API endpoints (C#, Entity Framework, SQL Server) and Crystal Reports reporting.
- Helped build the Angular web app with 15+ business modules: invoicing, point of sale, inventory, credit and collections, dispatch and logistics, commissions, pharmacy, marketing and HR. It supports multiple companies and currencies.
- Contributed to the sales-force mobile app in Flutter: catalog, orders, collections and sales-rep tracking, with TypeScript Cloud Functions.
- Trained new staff on the group's technology stack.

Web Developer — 02/2018 – 02/2019

OSM Soft Internacional — *Maracaibo, Venezuela*

- Contributed to a web sales application and provided technical support for the Premium Soft business software.

Team Lead / Frontend Developer — 07/2017 – 01/2018

Cable Hogar, C.A. — *Caracas, Venezuela*

- Led development of a web application for managing a cable operator's operations and trained the team on the project's technologies.

Frontend Developer — 11/2017 – 01/2018

Ricana Group — *Colombia · Remote*

- Added features and improvements to a travel and tourism system.

Developer **2014 – 2017**

Grupo Inartec, C.A. — *Venezuela*

- Contributed to SICODS, an online service-order and inventory management system that links each order to the company's inventory.
- Contributed to a medical management app prototype built on a low-code platform (Application Craft) with a PHP backend.
- Shipped new features to production every 2 weeks on average, in a team of 2 developers, 3 technicians and a coordinator.
- Worked with PHP, JavaScript and HTML.

FREELANCE PROJECTS

- Payroll receipts system: Node.js/Express APIs with MySQL and SQL Server, PDF generation, email delivery and a Flutter app.
- Skincare e-commerce: Angular 16, Firebase and Tailwind CSS.
- Flutter inspection app for a fire department.

COMMUNITY SERVICE

- City of Maracaibo: multi-module web platforms (PHP 8, MySQL, Bootstrap 5, Chart.js) for registration, history, statistics and PDF/Excel export. Database migrations with Phinx.

CERTIFICATIONS

AWS Fundamentals: Cloud, Serverless and Operations — Commit Academy 2026
Introduction to Data Analytics on Google Cloud — Arki1 2026
Google Cloud Fundamentals: Core Infrastructure — Arki1 2026
AI Development: Agents Program — BIG school 2026
